CELLULAR RESCUE PROGRAM

STOP INFLAMMATORY AGEING

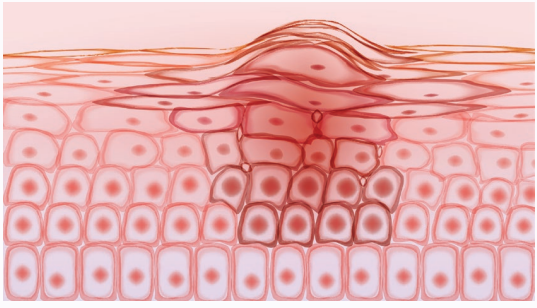

TEGODER
COSMETICS

What is Inflammaging?

Most visible signs of skin ageing are not caused by age itself, but by chronic low-grade inflammation, which manifests differently in each individual depending on their genetics and exposure to external factors.

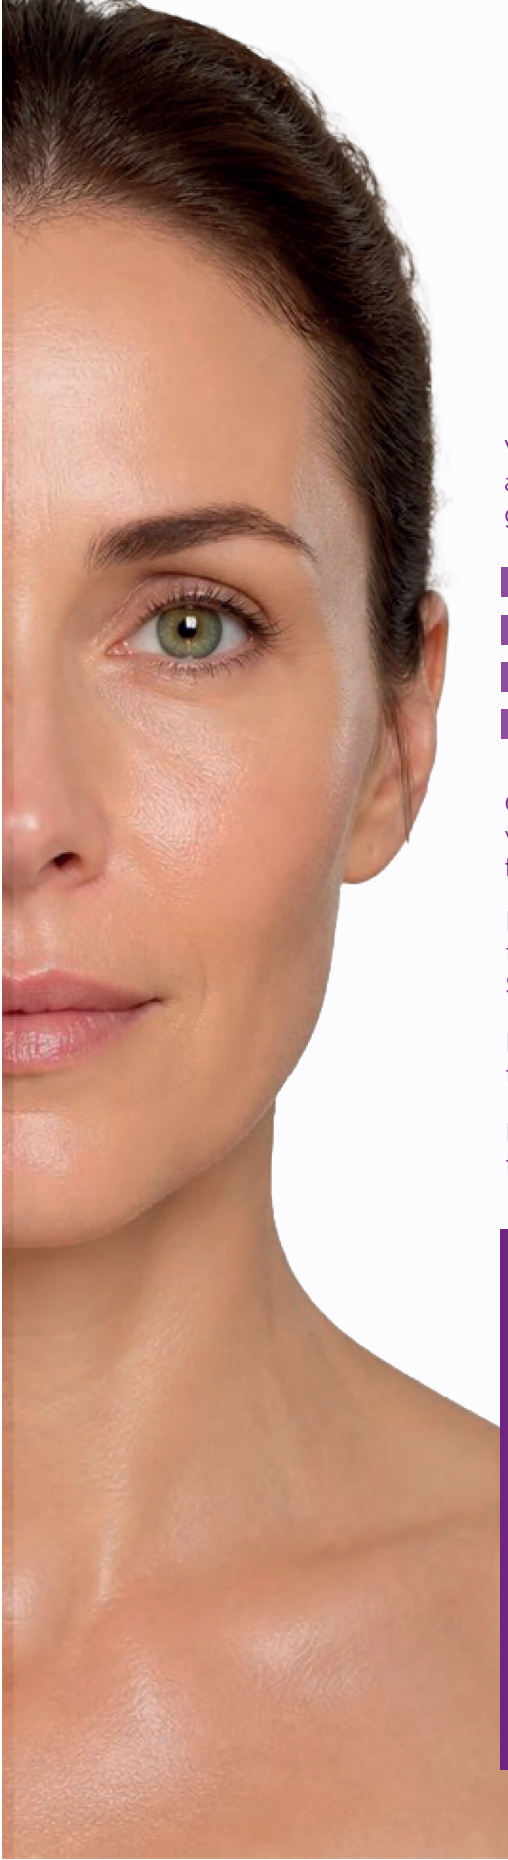

When the skin is exposed for years to:

- Oxidative stress
- UV radiation
- Pollution
- Skin barrier impairment
- Cellular stress

It enters a continuous state of inflammation that slows down cellular renewal and accelerates tissue degradation, leading to premature ageing:

- Wrinkles
- Loss of firmness
- Pigmentation spots
- Dullness
- Redness-prone skin
- Sensitivity
- Acne-prone skin
- Photoageing

CELLULAR RESCUE PROGRAM

STOP INFLAMMATORY AGEING

RENEW | REPAIR | RESTORE | PROTECT

With our IN&OUT strategy, we work from within and from the outside to restore the skin's biological balance.

ACTIVATE THE SKIN'S NATURAL REPAIR MECHANISMS

STIMULATE SKIN RENEWAL

SOOTHE PERSISTENT INFLAMMATION

RESTORE BARRIER FUNCTION

Combats the visible signs of ageing, reduces wrinkles and fine lines, helps restore skin density, and improves firmness.

Evens out the skin's overall texture, minimising the appearance of pores and delivering a Glass Skin effect.

Reduce las hiperpigmentaciones, equilibra el tono de la piel y aporta luminosidad.

Reduces hyperpigmentation, evens out skin tone, and boosts radiance.

Reset the skin

Inflamed skin doesn't need more products; it needs to restore its balance and break free from inflammatory ageing.

TDC Clinik creates

CELLULAR RESCUE PROGRAM

A programme featuring 3 IN&OUT protocols designed to free and reset the skin, helping to counteract the cellular damage caused by "Inflammaging."

Advanced Cosmetic Technology

The most comprehensive range of solutions, featuring next-generation formulas optimised to enhance the performance of advanced aesthetic devices and address the skin concerns associated with inflammaging.

Enzyblock Lotion

Repairing and brightening. Stimulates skin renewal, improves overall skin quality, and preserves the integrity of the extracellular matrix. Indicated as a complement to aesthetic medical procedures to enhance and prolong results.

For professional and at-home use.

- ENZYBLOCK COMPLEX
- HYALURONIC ACID
- SOOTHING COMPLEX
- VITAMIN E

Enzyblock Peel

Highly tolerable chemical peel. Promotes progressive skin renewal, helping to improve skin texture, even out skin tone, and enhance radiance. Suitable for introductory protocols, sensitive skin, and as a complement to facial aesthetic medical procedures.

For professional use only.

- LACTOBIONIC ACID
- ENZYBLOCK COMPLEX
- SOOTHING COMPLEX
- NIACINAMIDE

Enzymelablock Concentrate

Intensive brightening and depigmenting treatment. Formulated with a combination of depigmenting, skin-renewing, and antioxidant active ingredients. Reduces the appearance of hyperpigmentation, improves skin tone uniformity, and helps prevent the formation of new dark spots. Improves overall skin quality and helps address signs associated with photoageing.

For professional and at-home use.

- TRANEXAMIC ACID
- NIACINAMIDE
- ALPHA-ARBUTIN
- ACETYL GLYCYL BETA-ALANINE
- HEPES (hydroxyethylpiperazine ethane sulfonic acid)
- ENZYBLOCK COMPLEX
- ALLANTOIN

Exo-Fullbiotic Concentrate

Glass Skin Effect. Its innovative formulation helps support the balance of the skin microbiome, improves overall skin quality, and provides intensive hydration to achieve a more radiant, even, and translucent-looking complexion.

For professional and at-home use.

- FULLBIOTICS
- GINSENG-DERIVED PLANT EXOSOMES
- BIOFERMENT · TELOCYTE-PROTECTING COMPLEX
- HYALURONIC ACID

Exo-PDRN Plus Concentrate

Intensive regenerating action. Its formulation supports the skin's natural processes of cellular communication, repair, and regeneration, helping to improve the skin's ability to recover from ageing and external aggressors.

For professional and at-home use.

- PLANT-DERIVED EXOSOMES
- POLYNUCLEOTIDES (PDRN)
- BIOFERMENT · TELOCYTE-PROTECTING COMPLEX
- HYALURONIC ACID

Retinol Advanced

Exclusive Retinol + Retinal + Bakuchiol complex, designed to promote skin renewal, improve overall skin quality, and target the main visible signs of photoageing.
Indicated to enhance and maintain the results of anti-ageing, depigmenting, and anti-acne aesthetic medical procedures.

At-home facial gel-cream.

- ENCAPSULATED RETINOL
- ENCAPSULATED RETINAL
- BAKUCHIOL
- HYALURONIC ACID
- ALOE VERA
- OAT
- BISABOLOL
- CHAMOMILE EXTRACT
- VITAMIN E

Personalised Protocols

The impact of "Inflammaging" on the skin leads to a state of inflammation, sensitisation, congestion, loss of firmness, uneven skin tone, and dullness.
When the skin has remained inflamed for some time, it needs to move out of this defensive state in order to restore physiological balance, strengthen the skin barrier, and bring back the comfort and vitality that have been lost. The key lies in understanding and diagnosing this process of skin destabilisation in order to address its signs and manifestations, selecting the most appropriate TDC Clinik Intensive Cellular Programme protocol.

TDC Clinik Protocols

Cellular Bioregenerator EXO-PDRN Plus

A cutting-edge professional IN&OUT treatment specifically designed for the comprehensive restoration of demanding, damaged skin or skin showing signs of tissue stress.
This protocol combines the power of exosomes and PDRN to activate the skin's natural renewal mechanisms. Its intensive action supports cellular architecture, helps redensify the tissue, and repairs the skin barrier.

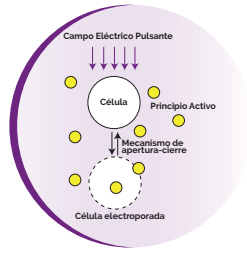

Microneedling is a minimally invasive technique that creates trans-epidermal microchannels, facilitating the penetration of active ingredients while stimulating the skin's natural repair mechanisms.

Glass Skin EXO-Fullbiotic

Advanced professional IN&OUT treatment designed to transform the skin's texture, revealing a translucent, radiant finish. Thanks to the synergy of exosomes and Fullbiotic active ingredients, this protocol acts immediately to soothe, decongest, and relieve skin stress, visibly reducing redness.

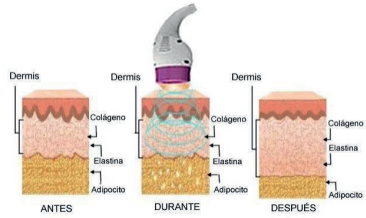

Electroporation, or virtual mesotherapy, is a technique that applies brief electrical pulses to create temporary channels in the cell membrane.

Multi-Action Brightening Enzymelablock

Advanced, high-precision professional **IN&OUT** treatment designed for the comprehensive management of pigmentation concerns and uneven skin tone.
Thanks to a cutting-edge molecular synergy combining tranexamic acid, niacinamide, and alpha-arbutin, this protocol targets key mechanisms involved in melanin synthesis.

Radiofrequency is a technology that uses high-frequency electromagnetic waves to heat the tissues in a controlled manner.

Because addressing aesthetic concerns comprehensively is the most effective solution.

The most comprehensive range of solutions, featuring next-generation active ingredients and nutricosmetics, designed to address facial aesthetic concerns associated with inflammaging through a comprehensive approach.

B10 Pre&Pro Dermis

A supplement containing turmeric, probiotics, and Chlorella algae (prebiotic), acting as an inner shield. Protects against oxidative stress and helps maintain the skin's natural physiological functions. Contributes to microbiome balance.

B33 Triactiv

A drinkable supplement containing collagen, hyaluronic acid, and turmeric. Boosts hydration and helps increase skin density.
Helps soothe tissues and mitigate tissue oxidative stress, protecting the skin and joints.

B24 Bronce

A supplement containing Dunaliella algae, vitamins, minerals, astaxanthin, and highly bioavailable carotenoids. Provides significant antioxidant and photoprotective benefits for the skin and eyes.

B125 Colagen Pur

A supplement containing hydrolysed collagen, hyaluronic acid, vitamins, minerals, and antioxidants. Helps maintain osteoarticular and skin health, as well as overall wellbeing.

TD CLINIK

The next generation of anti-ageing treatment.
Science + Technology + Personalisation
A new way of understanding skin ageing.
